Professional Summary

Computer Science undergraduate at IIIT Nagpur with hands-on experience in **software development, AI-enabled applications, workflow automation, and SQL database optimization**. Experienced in building **REST APIs** using Java and Spring Boot, integrating generative AI services, and testing and troubleshooting application workflows. Familiar with **Git-based development, Agile practices, and cloud technologies**, with a focus on scalable solutions and continuous improvement.

Education

Indian Institute of Information Technology (IIIT), Nagpur — Nagpur, Maharashtra
Bachelor of Technology (B.Tech.) in Computer Science and Engineering — *Aug. 2023 – Jun. 2027*

Experience

The Entrepreneurship Network (TEN) — Remote, India
Java Developer Intern — *Jun. 2026 – Present*

- Refactored a monolithic backend into **5 modular Java service layers**, improving code modularity, maintainability, and separation of shared utilities while eliminating circular build dependencies.
- Standardized **Git branching practices** and supported **Agile staging deployments** across 4 sprints, reducing code integration conflicts by **40%** through improved team collaboration.
- Troubleshot **SQL transaction bottlenecks** and **REST API payload exceptions** during staging integration, reducing average debugging cycle time by **15%** through systematic problem-solving.

Technical Skills

Languages: Java, SQL, JavaScript, Python, C++
Software Development: Spring Boot, Spring MVC, REST APIs, Hibernate/JPA, Microservices
AI & Automation: Spring AI, Generative AI Integration, AI-enabled Applications, Workflow Automation
Databases & Data: MySQL, Relational Schema Design, B-Tree Indexing, Query Optimization
Testing & Practices: JUnit 5, API Testing, Troubleshooting, Agile/Scrum, Jira
Cloud & Development Tools: AWS (EC2), Docker, Linux, Git, GitHub, Maven, Postman, OpenAPI/Swagger

Projects

Smart Email Assistant | *Java, Spring Boot, Spring AI, Gemini API, React.js* — GitHub Project

- Built an **AI-enabled email processing application** using Java, Spring Boot, and REST APIs to generate context-aware draft responses from incoming email payloads.
- Implemented **structured prompt validation** and asynchronous webhook workflows, reporting **95%+ response accuracy** and **60% lower manual drafting time**.
- Developed **Postman API test suites** to validate integration behavior and application reliability, with asynchronous processing achieving reported 99.9% API reliability and sub-2-second response generation latency.

TaskFlow AI – Agentic Workflow Automation | *Java, Spring Boot, MySQL, REST APIs* — GitHub Project

- Developed an **agentic workflow automation** application using Java, Spring Boot, MySQL, and REST APIs to support concurrent task execution and background processing.
- Implemented **asynchronous execution** and concurrency controls to improve processing reliability and prevent race conditions across shared resources.
- Built **event-driven notification workflows**, increasing event-handling throughput by **35%** and achieving zero dropped notifications under the tested conditions.

Scalable E-Commerce Backend | *Java, Spring Boot, MySQL, Maven* — GitHub Project

- Developed high-concurrency **RESTful microservices** using Java and Spring Boot for user authentication, product management, cart operations, and order processing.
- Optimized **MySQL query performance** using composite indexing, Common Table Expressions (CTEs), and window functions, reducing query latency by **40%** on high-traffic transactional endpoints.
- Maintained **ACID transaction integrity** and prevented inventory race conditions through optimistic/pessimistic locking strategies and `@Transactional` boundaries.

Achievements / Certificates

- **Semi-Finalist**, ET AI Hackathon 2026 (The Economic Times): Ranked among the top **1%** of nationwide developers for engineering a resilient, **multi-agent AI automation system** under a strict 24-hour deadline.
- **Data Structures & Algorithms**: Solved **200+ algorithmic challenges** across LeetCode and HackerRank, emphasizing time and space complexity optimization.
- **Technical Certifications**: Credentialed as a **Postman** API Fundamentals Student Expert; earned verified foundational Skill **Badges** in **Java** and **SQL** via HackerRank.
